The Filshie Clip System is recognised around the world as the number one choice for female sterilisation. The system is a market leader in many countries, accounting for 82% of sterilisations performed in England and 85% in Canada.

The Filshie Clip System is a market leader in many countries, accounting for 82% of sterilisations performed in England and 85% in Canada.

Gynaecologists around the world have come to rely on the Filshie Clip System for the following reasons:

1. Favourable Failure Rates
   - Crest 10-year follow-up study² indicates the following sterilisation failure rates for comparative methods:

<table>
<thead>
<tr>
<th>Method</th>
<th>Patients (No.)</th>
<th>Failure Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bi-Polar</td>
<td>2,267</td>
<td>2.48</td>
</tr>
<tr>
<td>Yoon Ring</td>
<td>3,329</td>
<td>1.77</td>
</tr>
<tr>
<td>Hulka Clip</td>
<td>1,595</td>
<td>3.65</td>
</tr>
</tbody>
</table>

   (Note: The Filshie Clip was not available in the US when the CREST Study was carried out)

Source: Penfield²

The Filshie Clip System procedure has demonstrated a failure rate of just 0.27%² (2.7 per 1000) and significantly less when applied by experienced clinicians, a figure supported by the successful application of over 12 million pairs of Clips worldwide.

2. Reduced Risk of Ectopic Failure
   - Failure of mechanical methods of sterilisation typically result in a 4%¹⁹ risk of ectopic pregnancy, compared to a 50-60%¹⁹ risk for bipolar and a 50%¹⁹ risk for other long-term methods of birth control such as some of the newer IUD’s.

3. Higher Reversal Rates
   - Because the Filshie Clip damages just 4mm of the Fallopian tube, reversal by reanastomosis is simplified and success rates enviably high. In a study of 130 reversals carried out, a 90% uterine pregnancy rate was recorded.

4. Effectiveness
   - The Filshie Clip is extremely effective for large tubes (post partum). The Filshie Clip is MRI compatible as the titanium contained within the Filshie Clip is non-magnetic, unlike stainless steel.

Sterishot II
Female Surgical Contraception
Single Patient Use

Sterishot II
Female Surgical Contraception
Single Patient Use

Standard Kit:
A convenient and simple entry level kit comprising:
- One Single Patient Use Filshie Sterishot II Applicator.
- One pair of Filshie Clips.
- One Disposable Shielded 8mm Trocar and Cannula.

Elite Kit:
A procedural kit comprising:
- One Single Patient Use Filshie Sterishot II Applicator.
- One pair of Filshie Clips.
- Two Disposable Shielded or Bladeless Trocar and Cannula (8mm + 10mm / 5mm).

Elite Plus Kit:
A procedural kit comprising:
- One Single Patient Use Filshie Sterishot II Applicator.
- One pair of Filshie Clips.
- One Disposable Shielded 8mm Trocar and Cannula.
- One Single Patient Use Filshie Sterishot II Applicator.
- One pair of Filshie Clips.
- Two Disposable Shielded or Bladeless Trocar and Cannula (8mm + 10mm / 5mm).

D.U.S.K.
Disposable Universal Sterilisation Kit:
A complete kit offering the user all the necessary components to carry out a female surgical contraception procedure.

D.U.S.K. Kit Contents:
- Sterishot II Single Patient Use Filshie Clip System (with 2 Filshie Clips).
- 8mm Shielded Trocar & Cannula (x1).
- 10mm Shielded Trocar & Cannula (x1).
- Fog-Off Lens Wipe (x1).
- Camera Sleeve (x1).
- “Spackman” Uterine Cannula (x1).
- 7.5mm Manipulation Probe (x1).
- 152x152cm Trolley Drape (x1).
- 157x72.5cm Left/Right Lithotomy Leg Drapes.
- 140x180cm Patient Drape 3 Fold (x2).
- 114x104cm Patient Drape with Adhesive (x2).
- 96x42cm Underbuttock Drape with Cuff (x1).
- 75x10cm, 3 ply Gauze Swabs (2 packs x 5).
- 15cm Lawrence Fine Jaw Needle Holder (x1).
- 12.5cm Straight Dressing / Vag Scissors (x1).
- 23.75cm Plastic Sponge Holding Forceps (x1).
- 2m x 6mm Insufflation Tubing (x1).
- 14g, 120mm Verres Needle (x1).
- 15cm Gillies Toothed Dissecting Forceps (x1).
- Sims Vaginal Speculum, large (x1).
- Teales Vulsellum Curved Forceps (x1).
- Scalpels No. 11 / No. 15 (x1).
- 14FG Female Catheter + Clip.
- Disposable Bag + Clip.

NB: To be used in conjunction with a Dilation and Curettage Kit (D & C).

D.U.S.K. Disposable Universal Sterilisation Kit
Product Code: FN-DUSK-900
Pack Size: 1 pc
The Femcare-Nikomed range of Classic Filshie Clip Applicators meets all surgeon requirements when it comes to different approaches necessary for the successful application of the Filshie Clip. Whether the surgeon uses a dual incision approach, a single incision approach or a minilaparotomy there is a Classic Filshie Clip Applicator to meet their needs.

It is important to remember that all Classic Filshie Clip Applicators must be serviced once a year or after every 100 procedures, whichever comes first. All servicing must be carried out by either Femcare-Nikomed in the UK or one of its approved operations in Canada, USA or Australia.

All Classic Filshie Clip Applicators have an expected life span of 7 years. During this period Femcare-Nikomed will service and repair all instrumentations, but Applicators older than 7 years will be deemed obsolete, and will not be accepted for service or repair.

**Trocar & Cannula**

The Classic Minilap Applicator is designed for use by the surgeon who carries out tubal ligation during either Caesarean Section or Minilaparotomy.

**Classic 5mm & 7mm Single Incision Applicators:**

The Classic Single Incision applicators are available in 5mm and 7mm diameters and are compatible with various operating laparoscopes.

*Please note that the 5mm Classic Single Incision Applicator must be back loaded into the working channel of the laparoscope prior to insertion into the abdomen.*

**Classic 7mm Dual Incision Applicator/Kit:**

Available in 7mm diameter, the Classic Dual Incision Applicator Kit comes complete with a reusable Trocar and Cannula specifically designed for the Filshie Clip System. Please note, the 7mm Dual Incision Applicator and reusable Trocar and Cannula are also available individually.

**Classic Minilap Applicator:**

The Classic Minilap Applicator is designed for use by the surgeon who carries out tubal ligation during either Caesarean Section or Minilaparotomy.

The Lawrence Add-a-Cath Suprapubic Catheter Introducer

The Lawrence Add-a-Cath is designed for easy suprapubic introduction of a catheter and is well established as a safe and cost effective tool for suprapubic catheterisation.

The single unit introducer is available in 16CH and 12CH sizes, individually packed in a sterile pouch and supplied in boxes of 10.

Lawrence Add-a-Cath Kit
The Lawrence Add-a-Cath Kit is a simple, quick and effective method of suprapubic bladder drainage. Compatible sterile components are conveniently packaged in a single disposable pouch.

Kit components include:
- 16CH/FR Lawrence Add-a-Cath Introducer.
- 16CH/FR or 18CH/FR 100% Silicone Suprapubic Balloon Catheter.
- No.11 Scalpel.

18CH/FR Lawrence Add-a-Cat Kit | AC-S18-901 | 10 pcs

Suprapubic catheterisation is recognised as an effective method of bladder drainage that causes fewer complications than urethral catheterisation. Features include:
- Smooth and controlled entry to abdomen causing minimal trauma.
- Easy catheter placement preventing chafing and damage to the catheter.
- Reduced risk of infection since no sutures or external fixation are required.
- Trouble free drainage, reduced blockage and increased patient comfort.
- Easy exchange due to internal catheter balloon.
- Non allergenic - 100% Silicone Suprapubic Catheter.
Auto-sufflation
2. Blunt
- Blunt tip for decreased trauma
- For use with cut-down and open techniques
- Spring-loaded anchoring collar
- Adjustable insertion depth
- Tie down suture bars

3. Bladeless
- Less trauma
- Smaller fascial defect
- Reduced need for post operative port site closure
- Protection from damage to the underlying viscera
- Reduced rate of port site herniation

4. Optical Bladeless
- Bladeless tip for reduced soft tissue defect
- Clear visualisation of abdominal layers giving more control
- Pistol grip for added comfort

5. "Dual Pack" Unshielded
- Bladeless tip for easy insertion
- Silicone seal for maintaining pneumoperitoneum
- Cost effective

6. Thoracic
- Enables simple, safe and stable entry
- Atraumatic thread for depth adjustment and decreased migration during procedures

1. Shielded
- Reduced insertion force
- Protection from damage to the underlying viscera
- Controlled arming technology
- Spring-loaded blade shield

The Femcare-Nikomed Single Patient Use Trocar and Cannula Range is available in Shielded, Bladeless, Optical Bladeless, Blunt and Thoracic technology. The range is suitable for routine use in all minimally invasive surgery and has been designed with the surgeon and patient in mind combining performance with safety.

The Trocar and Cannula range has comprehensive features giving confidence and consistency every time.

1. Shielded Trocar and Cannula Range: Consists of a plain straight blade and a spring-loaded blade shield. The shield is designed to cover the blade once abdominal access has been gained in order to safeguard against damage to the underlying viscera.

2. Blunt Trocar and Cannula Range: Allows access to the abdomen once a cut-down or Hasson technique has taken place. The blunt trocar is used to gain access to the abdominal cavity whilst the spring-loaded threaded collar is used to keep the cannula firmly in place.

3. Bladeless Trocar & Cannula Range: Encompasses performance and safety. With constant downward pressure and a slight twisting motion the bladeless trocar tip separates tissue layers rather than cuts them. This results in a smaller fascial defect causing less trauma to the abdominal wall.

4. Optical Bladeless Trocar & Cannula Range: Allows access to the abdomen using bladeless technology. The trocar enables new levels of control via direct vision of the abdominal layers during insertion. The bladeless tip decreases the soft tissue defect and speeds up recovery.

5. "Dual Pack" Unshielded Trocar and Cannula: The perfect secondary port including a leak free seal which maintains pneumoperitoneum throughout surgery.

6. Thoracic Trocar and Cannula Range: Thoracic Trocar and Cannula enables simple, safe and stable entry. To use the trocar an adequate incision has to be made into the thoracic cavity. The cannula can then be threaded into the chest wall. The atraumatic thread allows depth adjustment and decreased migration during procedures.

Holmium Laser Fibres

Delivering power where it’s needed most...

Holmium Laser Fibres

Reusable & Single Patient Use Versions

- Polished Tip for Targeted Energy.
- Durable for the Hardest Case.
- Flexible for Lower Pole Treatment.

Laser Googles

Holmium Laser Fibres

Affordable Quality
No need to sacrifice quality for price. Total commitment to value brings you dependable fibre delivery systems with improved visibility at an affordable price.

Variety of Sizes
200, 365, 550 and 1000 micron diameter fibres. This wide range of sizes provides the options you need to cover your specific surgical applications.

Laser Compatibility
Fibre is terminated with a SMA-905 connector specifically designed to work with most Holmium and Nd:YAG laser systems on the market. However, we also offer an alternative range suitable for use with Trimedyne Holmium Lasers.

Dual Wavelength Fibre
Each fibre is designed and FDA cleared to accept and transmit both the Holmium and Nd:YAG wavelength, providing both convenience and cost savings.

Scope/Handpiece Compatibility
Fibres are compatible with flexible, semi rigid and rigid endoscopes, as well as reusable handpieces.

Laser Eye Protection
- Compatible with both CO2 and Holmium Lasers.
- Hospital / Unit’s logo can be printed onto the goggles, this exclusive personal feature comes included in the price.
- Soft and Hard Cases are included.

Laparoscopic Instrument Range

Single Patient Use

Cost effective, ergonomic instrumentation...

The Femcare-Nikomed Laparoscopic Instrument Range.

Designed for single patient use and is suitable for all routine laparoscopic procedures requiring dissection, cutting, grasping and coagulation.

- The instruments are robust to facilitate prolonged use whilst the delicate tips enable fine dissection.
- 360° rotational knob to aid manoeuvrability during surgery.
- The monopolar electrosurgery post allows connection to a standard electrosurgery cable.
- Insulated 5mm diameter shaft.
- Ratchet for secure controlled grasping (not applicable for Maryland/Scissors).
- Available in 6 tip configurations.

Insufflation Tubing: 22mm Connection | FN-INS-022 | 10 pcs
Smoke Evacuation Tubing | FN-200-224 | 10 pcs

1. The Verres Needle with its red visual indicator gives audible feedback on entry to abdominal cavity. Safety and control at your fingertips:
- Available in two sizes, 120mm and 150mm.
- Red visual indicator.
- Spring loaded stylet for audible feedback on access to the abdomen.
- Ergonomic grip.
- High flow capacity.

2. The Insufflation Tubing range can be utilised during all surgical procedures where insufflation of the abdomen is required:
- 0.02 micron high quality filter.
- 99.99% filtration efficiency.
- Available with five different insufflator connectors.
- Can accommodate high flow rates.
- Lightweight and durable.

3. The Suction & Irrigation Tubing allows:
- Ergonomic handle to fit all hand sizes.
- Clear indicator buttons.
- Consistent flow rate.
- Strong and robust tubing.
- 2 standard sizes.

4. Smoke Evacuation Tubing:
- For a clear field of vision.
- Available with five different insufflator connectors.
- Can accommodate high flow rates.
- Lightweight and durable.

“Spackman Style”
Uterine Cannula

Single Patient Use

The Femcare-Nikomed Uterine Cannulas are based on the “Spackman” design. They are a single use device designed for manipulation of the uterus and injection of fluid.

The “Spackman” cannula is provided with an adjustable locking mechanism for holding the Vulsellum forceps in place, these are used to ‘grasp’ the cervix ensuring a tight seal. Once the manipulator is in place uterine manipulation is possible.

The holes in the distal end of the manipulator allow for hydrotubation to test the patency of the fallopian tubes; either by injecting dye or contrast medium and checking its flow through the uterus and fallopian tubes during laparoscopy or hysterosalpinography.

Option 1:
- Adjustable screw locking mechanism for holding the Vulsellum forceps in place.
- Luer lock fitting.
- Adjustable cervical cone to achieve an effective seal.
- Weights can easily be attached to the cannula to help hold it in position.
- Holes in the distal end allow for hydrotubation.

Option 2:
- Adjustable locking mechanism for holding the Vulsellum forceps in place.
- Luer lock fitting.
- Fixed cervical cone to achieve an effective seal.
- Weights can easily be attached to the cannula to help hold it in position.
- Holes in the distal end allow for hydrotubation.

The Single Patient Use Femcare-Nikomed Pressure Infusor is designed for rapid fluid infusion, invasive pressure monitoring and autotransfusion procedures.

The Pressure Infusor is made from a white nylon material that provides durability and assures cleanliness. Accurate pressure readings are displayed on an aneroid gauge. Fluid levels are easily viewed through the clear sleeve material which provides a fluid shield in the case of a ruptured fluid bag. The Pressure Infusor is available with either a traditional thumbwheel air control valve or a leakproof stopcock. Features include:

- Convenient IV pole loop.
- IV fluid bag hook.
- Durable nylon bladder.
- Reinforced clear sleeve.
- Strong no-crimp tubing.
- Traditional thumbwheel air control or leakproof stopcock.
- Palm-fitting, efficient hand bulb.
- Certified accurate aneroid gauge +/- 2mmHg @ 300mmHg.
- Latex Free.

No Scalpel Vasectomy

Reusable

No Scalpel Vasectomy is widely accepted as a safe, inexpensive and simple method of permanent contraception for men.

Vasectomy is widely accepted as a safe, inexpensive and simple method of permanent contraception for men. No Scalpel Vasectomy is an effective method of vasectomy offering a number of proven benefits over other traditional techniques:

- The puncture technique employed causes less bleeding than the traditional method involving sharp dissection.
- The local anaesthetic is injected caudally, therefore, no oedema is caused allowing easier pick-up of the vas deferens with the vas clamp.
- Other than scissors, only two instruments are required resulting in a less complicated procedure (Fig 1 and Fig 2).

![Fig 1: Illustrates the vas clamp encompassing the vas deferens](image1)

![Fig 2: Illustrates the dissecting forceps separating the skin to reveal the vas deferens](image2)

Skin Stapler & Staple Remover

Single Patient Use

The Femcare-Nikomed Single Use Skin Stapler is suitable for routine wound closure in various surgical procedures, including gynaecology, abdominal, orthopaedic and thoracic surgery. The product can also be used for other indications such as: breast surgery, plastic and reconstructive surgery and thyroidectomy.

The Skin Stapler is ergonomically designed with a handle designed for comfort, irrespective of hand size. This instrument’s ease of use assists in the precise deployment of each staple. The clear stapler body allows visibility of the staples remaining.

The affordable quality solution for perfect wound closure...
Creating an instant sterile field...

Cleaning and sterilising theatre cameras and cabling between cases is a delicate and time-consuming process. Repeated sterilisation may also damage expensive equipment.

The Femcare-Nikomed Camera Sleeve Range provides 3 options to create an instant sterile field around endoscopic camera heads and cabling. By eliminating the need for between-case sterilisation, these sleeves can save money on costly repairs and prolong the life of your equipment.

Benefits:
- Sleeves fit all cameras.
- Latex free.
- Fully disposable.
- Individually sterile packed.

Product Description | Product Code | Pack Size
--- | --- | ---
Camera Sleeve 2.5m - Folded | FCSS25000 | 20 pcs
Camera Sleeve 2.5m - Standard | FE-CSL-2500 | 10 pcs
Camera Sleeve 2.5m - Secure Clip | FCSS225000 | 20 pcs

Ensuring a simple procedure remains simple...

**The Femcare-Nikomed disposable sterile H.R.T Tray for hormone replacement therapy is designed to help the busy nurse and doctor reduce the time consuming preparation normally required prior to performing hormone implants.**

The H.R.T Tray eliminates both expensive re-sterilisation costs and also the time lost in cleaning instruments. The likelihood of delays caused by the occasional forgotten item is also eliminated, thus ensuring that a "simple procedure remains simple..."

The tray includes the necessary equipment for hormone implantation, which should be decided upon according to clinical indications.

---

**Items Not Included**
- Local Anaesthetic
- Hormone Pellet

These conditions apply to the sale of the Company's Products, unless otherwise agreed in writing. In these conditions, the words and phrases listed below will have the following meanings:

“Company” means Fencare-Nikomed Limited, Stuart Court, Spursholt Place, Salisbury Road, Romsey, Hampshire, England, UK. S05 1DJ.

“Contract” means the contract between the Company and Customer for the sale and purchase of the Products including these conditions;

“Customer” means the purchaser of the Company's Products;

“Products” means the Products to be supplied by the Company under this Contract.

1. FORMATION OF CONTRACT

1.1 All quotations, offers and tenders are made and all orders are accepted subject to the following conditions. Except as otherwise provided in these conditions, all other terms, conditions or warranties are excluded from any Contract between the Company and the Customer unless expressly accepted in writing by the Company.

1.2 If there is a conflict between these conditions and any other terms of the Company's quotation, offer, tender or acknowledgement of order, such other terms shall prevail (to the extent of the conflict only).

1.3 The Customer shall, in respect of each order for the Products to be supplied hereunder, be responsible for:

1.3.1 ensuring the accuracy of the order;

1.3.2 providing the Company with any information which is necessary in order to enable the Company to fulfil the order and to comply with all labelling, marketing and other applicable legal requirements in the territory in which the Products may be sold; and

1.3.3 obtaining any necessary import licences, certificates of origin or other requisite documents, and paying all applicable customs, duties and taxes in respect of the importation of the Products into the territory and their resale in the territory.

1.4 Prices are quoted by the Company on the basis of the limitations of liability set out in these conditions. The Customer shall be entitled to request the Company to agree a higher limit of liability and the Company may then quote a revised price taking account of any increased risk to be borne by the Company, provided that the Company shall not be obliged to agree to any higher limitation of liability.

2. PRICES

2.1 Unless otherwise agreed in writing, all prices are quoted net ex-works exclusive of VAT. If the Company agrees to deliver the Products otherwise than at its premises the Customer shall pay all packaging, transportation and insurance costs, duties, taxes and all other charges incurred by the Company in making or arranging such delivery.

2.2 The Company shall have the right at any time to revise non-contract prices to take account of increases in costs including (without limitation) costs of labour, materials, carriage or overheads. Any such increase in costs will be added to the quoted price.

3. PAYMENT

3.1 Payment shall be due and payable by the Customer without any set off, counterclaim or deduction whatsoever within thirty days after the invoice date.

3.2 Where Products are delivered by instalments, the Company reserves the right to invoice the Customer separately for Products delivered by instalments after such instalment has been delivered and the provisions of these conditions shall apply in full to such invoices as if such instalment was a separate Contract.

3.3 If the Customer fails to pay the Company any sum due pursuant to the Contract within the period specified in 3.1 above the Customer shall be liable to pay interest to the Company on such sum at a compounded interest rate of 2% per month on any overdue account. The Company reserves the right to claim interest under the Late Payment of Commercial Debts (Interest) Act 1998.

4. DELIVERY

4.1 Delivery of the Products shall be given and taken at the Company's premises unless the Customer has specifically agreed in writing to arrange transport for the Products in which case delivery shall occur when the Products arrive at the designated place of delivery.

4.2 The Company will use reasonable efforts to deliver the Products in accordance with estimated delivery times specified by the Company in response to the Customer's order, but delivery shall not be of the essence.

4.3 The Customer shall have no right to damages or to cancel the Contract for failure for any cause to meet any delivery time stated nor shall the Customer be entitled to make, or to purport to make, time for delivery of the essence of the Contract.

4.4 Upon delivery of the Products, the Customer is responsible for insuring the Products for their full replacement value until title passes to the Customer.

5. RISK AND TITLE

5.1 Risk of loss or of damage to any consignment of the Products shall pass to the Customer from the time the Company notifies the Customer that the Products are available for collection or from the time of delivery to the carrier at the Company's premises, whichever is earlier.

5.2 Notwithstanding delivery to the Customer, title of the Products shall remain with the Company until the Customer has paid to the Company all sums (including any default interest) due from it to the Company.

6. NOTIFICATION OF LOSS OR DAMAGE

6.1 Any claim that the Products are damaged or have been short delivered must be communicated in writing to the Company within 3 days of arrival at the Customer's premises. Non-delivery must be reported to the Company within 7 days of the expected date of receipt.

6.2 If the Customer fails to give notice in accordance with this clause, the Customer shall be bound to pay for, and shall lose any right to make a claim, in respect of such non-delivery, short delivery or loss or damage covered by this clause.

7. RETURN PRODUCTS

7.1 Products which will be accepted for return are as follows:- Products damaged in transit; Products alleged to be defective; Incurably delivered Products.

7.2 Exclusions:- Products with less than 50% of shelf life remaining; Products shipped more than 3 months prior to the return request.

7.3 Return Authorisation Procedure:-
- Contact Customer Services to obtain authorisation, such authorisation to be given at the Company's sole discretion.
- All returns must be accompanied with a note stating product, quantity and full reason for return.
- All returned shipments must be prepaid except in certain circumstances when the Company will arrange collection. Cash On Delivery packages will not be accepted.
- Only Products originally purchased from the Company will be accepted for return.
- Products returned with authorisation will attract a re-stocking/administration charge of 15%.
- Products returned without authorisation from the Company will not be accepted.

7.4 All Products returned for repair or as a complaint must be decontaminated if the product has been used or exposed to body fluids. A decontamination certificate to comply with Health and Safety Legislation and Department of Health requirements must accompany the product.

8. REFUSED DELIVERIES

8.1 The Company reserves the right to charge the Customer for any transport, storage or other costs reasonably incurred if for any reason the Customer is not able promptly to accept Products tendered for delivery.

9. FORCE MAJEURE

9.1 The Company shall be under no liability for any delay or failure to perform the Contract in the event that the manufacture, supply or delivery of the Products is prevented or delayed by any act or circumstance beyond the Company's reasonable control including, but not limited to, an Act of God, legislation, war, fire, drought, failure of power supply, lock-out, strike or other action taken by employees in contemplation or furtherance of a trade dispute or owing to any inability to procure materials required for their performance on the Contract.

9.2 The Company shall notify the Customer of any circumstance arising under this force majeure condition and if such circumstance prevails for more than 3 months then either party shall have the option by giving notice in writing to cancel any contracts or outstanding orders.
10. WARRANTY

10.1 The Company’s warranty obligations in respect of the Products are detailed within the product literature published in respect of specific Products. The Customer should refer to this documentation or contact the Company for further details regarding the warranty period and the Company’s instructions that must be adhered to in order to rely on such warranty.

10.2 The Company shall not be liable for any loss or damage sustained by the Customer resulting from defects in the Products caused by fair wear and tear, fire or accident or from the Customers wilful damage to, misuse or neglect of Products, or from unauthorised installation, alterations to or repairs of the Products carried out by the Customer or any third party, or from the Customer’s failure to use the Products in accordance with their intended purpose or the Company’s instructions.

11. LIMITATION OF LIABILITY

11.1 The Company does not exclude liability for death or personal injury caused by its negligence or for fraudulent misrepresentation.

11.2 Notwithstanding condition 11.1 above, the Company shall have no liability to the Customer (whether for breach of Contract, tort (including, but not limited to negligence), or for any breach of statutory duty) for any of the following losses or damages suffered or incurred by the Buyer:-
   i) any loss of profit;
   ii) any loss or damage to goodwill;
   iii) any increased costs;
   iv) any loss of revenue; and
   v) any special, indirect or consequential losses or damages.

11.3 Without prejudice to conditions 11.1 and 11.2 above, the Company’s total aggregate liability for all claims made by the Customer in relation to the Contract (whether arising through a breach of Contract, tort (including, but not limited to, negligence) or any statutory duty) shall not exceed the price payable by the Customer for the Products giving rise to the claim.

12. THIRD PARTIES

12.1 A person who is not a party to the Contract (a “third party”) shall have no rights pursuant to the Contracts (Rights of Third Parties) Act 1999 (the “Act”) to enforce any of these conditions. Any right or remedy of a third party which exists or is available apart from the Act shall not be affected.

13. DATA PROTECTION

13.1 The processing of personal data is governed by the Data Protection Act 1998, under which the Company is registered as a data controller. Any personal data provided will be held securely and in accordance with the Data Protection Act 1998. Personal data will be used for the purpose(s) in relation to which you have provided it. We may however need to disclose personal data to a third party. We may additionally need to disclose information where there is a legitimate reason for disclosure (such as a court order) but we will ensure that we always comply with the Data Protection Act 1998. As a data subject you have the right to ask for a copy of personal data about you and to ask for inaccuracies to be corrected. Queries about compliance with the Data Protection Act should be addressed to the Company.

14. GOVERNING LAW

14.1 The parties agree that any disputes arising or in any way connected with the subject matter of these conditions shall be subject to the Laws of England and in the case of proceedings issued by the Customer shall be subject to the jurisdiction of the English Courts only.
